Manage your healthcare spending with an HSA

HSAs are a simple, convenient way to save for future medical expenses. You can use them for all kinds of medical expenses—from deductibles and copays to prescriptions and X-rays. An HSA is easy to set up, easy to use, and stays with you, year after year.

You must be enrolled in a high-deductible health plan (HDHP) to open and contribute to an HSA. For more information, read the FAQs on page 11.

Learn about the many advantages of HSAs

You earn a **triple tax** advantage

An HSA works like a retirement savings account, letting you save and invest a piece of your paycheck toward healthcare costs. When you contribute to your HSA, you get a triple tax advantage:

- The money you put into your HSA may reduce your taxable income.
- Interest earned on your HSA funds is tax-free.
- The money you take from your HSA for qualified medical expenses isn't taxed.

HSA contributions are subject to annual contribution maximums

Account holders who are 55 years or older can contribute an **extra \$1,000**.

Your HSA stays with you, no matter what

Your HSA funds roll over, year after year. There is no deadline to use the funds, so you can hold onto the money for years—you can even wait until retirement to use it. If you leave your current employer, **your HSA is yours to keep**.

How to use and manage your HSA

Purchases or other qualified medical expenses can be made directly from your HSA account by using your HSA debit card, online bill payment, or a check.

Answers to frequently asked questions

What is a health savings account (HSA)?

An HSA is a tax-advantaged personal savings account that can be used to pay for medical, dental, vision, and other qualified medical expenses, now or later in life. To contribute to an HSA, you must be enrolled in a qualified high deductible health plan (HDHP). Your contributions are subject to annual IRS limits. The funds can be invested as an addition to your retirement portfolio.

Am I eligible to participate?

In order to contribute, you must be enrolled in a qualified HDHP, cannot be covered under a secondary health insurance plan or be enrolled in Medicare, and you cannot be another person's dependent. There are no eligibility requirements to spend previously contributed HSA funds.

How much can I contribute to my HSA?

2025 contributions can be made by the eligible employee, their employer, or any other individual. In 2025, annual contributions from all sources may not exceed \$4,300 for individuals or \$8,550 for families. Individuals aged 55 and over may make an additional \$1,000 catch-up contribution.

When does an HSA become interest-bearing?

Many HSAs provide interest regardless of account balance, much like an interest-bearing checking or savings account. Savers can earn interest on contributions, and the interest accumulates tax-free. UMB Bank account holders can transfer HSA funds into an investment account once their HSA account balance reaches \$1,000. (UMB Bank investment accounts are subject to an additional fee, are not FDIC-insured, are not guaranteed, and may lose value.)

Do I have to spend all my contributions by the end of the plan year?

No. Unlike a flexible spending account (FSA), your HSA funds roll over, year after year. The money is yours to keep and there is no deadline to use the funds.

Where can I learn more?

Once you have registered for [BlueCare Connect](#) on or after 1/1/2025, log in to your account and select [HSA](#) under [Your Health Plan](#). Here, you can find a personal dashboard showing your balances and claims history and get access to pay bills. You will also find tools and resources to help you make the most of your HSA.
